

Khushi Sharma

Full-Stack Developer | MERN Stack

✉ khushisharma.50031@gmail.com ☎ +91 8077128901

📍 Uttarakhand, India • Open to Remote Opportunities  LinkedIn  Github  Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer with 6 months of remote internship building responsive web applications using React.js, TypeScript, and Next.js. Experienced in developing REST APIs, implementing JWT-based authentication, and building full-stack applications using the MERN stack. Currently exploring LLM API integration and AI-assisted web applications while continuing to expand full-stack development skills.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science 2023 – 2026 | Ghaziabad, Uttar Pradesh
Sunderdeep Engineering College

Diploma in Information Technology (IT) 2020 – 2023 | Kashipur, Uttarakhand
Government Polytechnic, Kashipur

SKILLS

- **Languages & Frontend** — HTML5 | CSS3 | JavaScript | TypeScript | React.js | Next.js | Tailwind CSS
- **Backend & APIs** — Node.js | Express.js | MongoDB | REST APIs | JWT Authentication | SQL (Basics)
- **Tools & Platforms** — Git | GitHub | Vercel | Render | MongoDB Atlas | Docker | npm | Figma | Framer

PROFESSIONAL EXPERIENCE

UI Developer Intern, CC App Labs  10/2025 – 03/2026 | Bengaluru(Remote)

- Developed responsive frontend interfaces for a travel platform using React.js, TypeScript and Next.js based on Figma designs.
- Built reusable components and scalable page structures for homepage, blog listing, and blog detail sections.
- Improved responsiveness across signup, login, OTP verification, forgot password, and reset password flows.
- Collaborated in a remote development team through Git-based workflows, pull requests, bug fixes, and asynchronous communication with designers and developers.

PROJECTS

Olive & Thyme — Full-Stack Recipe Sharing Platform ,

MongoDB • Express.js • React.js • Node.js • TypeScript • JWT • Tailwind CSS • Docker • Figma • Vercel • Render

- Designed complete UI independently in Figma before development — layout system, component structure, and visual hierarchy.
- Built full MERN stack application with JWT authentication, bcrypt password hashing, and protected routes.
- Integrated the Spoonacular REST API with async/await to support recipe discovery and dietary filtering while handling loading and error states.
- Containerized the frontend and backend using Docker and Docker Compose, and deployed the application on Vercel and Render with MongoDB Atlas.

EmoTracker — AI-Enhanced Mood Journal App ,

React.js • Vite • React Router • Node.js • Express.js • Gemini API • CSS • GitHub Pages • Render

- Built a mood-tracking app with daily journaling, emotion tagging, and past entry history; implemented client-side routing for smooth GitHub Pages deployment.
- Integrated the Gemini API to generate personalized journal insights from entry text and emotion, engineering prompts for structured JSON output.
- Built a lightweight Express backend deployed on Render to securely proxy API requests, keeping credentials off the client and adding rate limiting.

Personal Portfolio — Developer & Design Showcase , *HTML • CSS • JavaScript • Figma • Responsive Design*

- Designed complete UI in Figma before development — layout, typography, color system, and component structure.
- Built responsive multi-page site with scroll animations, Formspree contact integration, and separate sections for code and design work.
