🌐 LinkedIn 🐙 Github 🔗 Portfolio

Summary

MERN Stack Developer with experience building responsive web applications using React.js, TypeScript, Node.js, Express.js, and MongoDB. Completed a 6-month remote internship focused on UI implementation, component-based architecture, and Figma-to-code delivery for a real product. Passionate about translating designs into clean, user-focused web experiences. Currently exploring LLM API integration and AI-assisted web applications as part of expanding full-stack development skills.

Education

Bachelor of Technology (B.Tech) in Computer Science, 2023 – 2026 | Ghaziabad, Uttar Pradesh
Sunderdeep Engineering College

Diploma in Information Technology (IT), 2020 – 2023 | Kashipur, Uttarakhand
Government Polytechnic, Kashipur

Skills

Languages & Frontend — HTML5, CSS3, JavaScript, TypeScript, React.js, Tailwind CSS
Backend & APIs — Node.js, Express.js, MongoDB, REST APIs, JWT Authentication
Tools & Platforms — Git, GitHub, Figma, Framer, Vercel, Render, MongoDB Atlas, npm

Professional Experience

UI Developer Intern — CC App Labs 10/2025 – 03/2026 | Bangalore (Remote)

- Developed responsive frontend interfaces for a travel platform using React.js and TypeScript based on Figma designs.
- Built reusable components and scalable page structures for homepage, blog listing, and blog detail sections.
- Improved responsiveness across signup, login, OTP verification, forgot password, and reset password flows.
- Supported pull request documentation and resolved UI bugs in a remote team environment.

Projects

Olive & Thyme — Full-Stack Recipe Sharing Platform,
MongoDB • Express.js • React.js • Node.js • TypeScript • JWT • Tailwind CSS • Figma • Vercel • Render

- Designed complete UI independently in Figma before development — layout system, component structure, and visual hierarchy.
- Built full MERN stack application with JWT authentication, bcrypt password hashing, and protected routes.
- Integrated Spoonacular API to enable recipe filtering based on dietary and health preferences.
- Implemented real-time notification system for recipe likes and comments; deployed on Vercel and Render with MongoDB Atlas.

Personal Portfolio — Developer & Design Showcase, *HTML • CSS • JavaScript • Figma • Responsive Design*

- Designed complete UI in Figma before development — layout, typography, color system, and component structure.
- Built responsive multi-page site with scroll animations, Formspreet contact integration, and separate sections for code and design work.

EmoTracker — Mood Journal App, *React.js • Vite • React Router • CSS • GitHub Pages*

- Built a mood-tracking app with daily journaling, emotion tagging, and past entry history.
- Implemented client-side routing for smooth GitHub Pages deployment; fully responsive with a minimal pastel UI.
